

EXCITEMENT IS BUILDING | PROJECT PROGRESS

The area outside and around the building is getting closer and closer to the final product as bicycle racks and lockers are being installed and the parking lot light poles have been placed. Tile work has begun in the bathrooms and lights continue to be mounted in the ceiling. The exterior switch gear and CT cabinet have been placed and are being wired in preparation for the transformer. The tent which covered the main entrance for its preparation will be taken down shortly and the main entrance plaster work will be complete.

LOOKING AHEAD...

- The bronze bar stock and wood wall covering lobby walls will start
- Tile and paint continue towards completion
- The main entrance will be revealed very shortly
