

EXCITEMENT IS BUILDING | PROJECT PROGRESS

The weather has continued to slow earthwork and utility installation but some progress has been made. The site is being brought to final grade and the building pad is being prepared. With dry weather the first concrete foundations should be installed in less than ten days.

LOOKING AHEAD...

- Temporary power to be provided by PEPCO
- Rough site grading finalized
- Street utility work.
- Concrete foundations installed

RECENT PROJECT IMAGES

This is the view from the future parking lot to the front door of the building.
